

RELY ON EXCELLENCE

D Type expansion joints

Expansion joints | Rubber expansion joints

Features

- Transportation or piping systems that carry fluids, slurries or gasses under pressure or vacuum at varying temperatures
- Reduction of vibration
- Dampen sound transmission
- Compensate movements due thermal changes, misalignments caused by wear, load stresses, settling of supporting foundations
- Molding production with long radius arch
- Standard measures (length)

Advantages

- Easy installation, flanges can be rotated
- For installation with "torsional misalignments"
- Flanges are not in contact with medium, which enables lower grade material
- Galvanic surfaces/ coatings possible
- Gaskets can be eliminated
- Additional movement capabilities
- Self cleaning arch (no need filler material)
- Economic

Operating range

Diameter: DN 25 ... DN 750 (1" ... 30"),
Pressure up to 16 bar (232 PSI)
Temperature up to 110 °C (230 °F)
Movements: all directions

Materials

- Bellows: Various elastomers such as EPDM, EPDM Food Grade, Neoprene, Nitrile(NBR), Hypalon, Viton
- Flanges: carbon steel and stainless steel

Other materials are available on request.

Standards and approvals

NDT and documentation: Can be provided per customer request e.g. Material Certificates and NDT test reports.

Recommended applications

- Air conditioning, heating and ventilating systems in industrial buildings and vessels
- Central and ancillary power generating stations in industrial buildings, factories, ships and offshore applications
- Sewage disposal and water treatment plant, pumps, etc.
- Process piping in pulp and paper plants
- Piping systems for chilled or hot water
- Cooling systems for power generation
- Feed water and draining lines for water works, sewage, sanitary piping systems etc.
- Oil lines for industrial plants, shipyards, phosphate plants etc.

RELY ON EXCELLENCE

D Type expansion joint

Item Description

- 1 Rubber bellows
- 2 Flanges
- 3 Reinforcement ring
- 4 Loose bracket
- 5 Tie rods
- 6 Nuts
- 7 Spherical washers

RELY ON EXCELLENCE

Installation, details, options

D type without tie rods

Item Designation

- 1 Rubber bellows
- 2 Flanges
- 3 Reinforcement ring

D type with tie rods

Item Designation

- 1 Rubber bellows
- 2 Flanges
- 3 Reinforcement ring
- 4 Loose brackets
- 5 Tie rods
- 6 Nuts
- 7 Spherical washers

RELY ON EXCELLENCE

Product variants

D type double arch

Higher maximum movements, lower spring rates.

D type PTFE liner

High temperatures or chemical attack. Not recommended for negative pressure.
