

esybox pop

ELECTRONIC PRESSURISATION SYSTEM

PERFORMANCE RANGE

The performance curves are based on kinematic viscosity values = $1 \text{ mm}^2/\text{s}$ and density equal to $1000 \text{ kg}/\text{m}^3$. Curve tolerance according to ISO 9906.

GRAPHIC SELECTION TABLE

ESYBOX POP

ELECTRONIC PRESSURISATION SYSTEM

TECHNICAL DATA

Flow rate: up to 3.9 m³/h

Head: 32 m

Type of pumped liquid: clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallised, and chemically neutral

Liquid temperature range: 5 °C to +50 °C

Maximum ambient temperature: +50°C

Maximum working pressure: 6 bar / 600 kPa

Motor protection rating: IPX5

Motor insulation class: F

Impeller material: technopolymer

Single-phase power supply: 230 V 50 Hz

Power cord length and plug type: 1,5 m

Installation options: can be installed vertically or wall-mounted using a dedicated accessory

Certifications: WRAS, ACS, NSF

This electronic pressurisation system is designed for small residential environments.

It features sound-absorbing materials and a water-cooled permanent magnet motor, ensuring quiet operation, which makes it particularly suitable for home use.

The professional performance of this device is ensured by its advanced components, which include: an anti-cycling feature, which detects leaks by monitoring the frequency of starts and stops; an automatic shut-off mechanism that activates in the event of dry running; an anti-freeze system - to prevent ice formation in the hydraulic components, the pump activates when temperatures drop below 5°C; a motor-protection technology to prevent issues from prolonged inactivity.

The adjustable connections facilitate quicker, easier, and more flexible installation.

Integrated connectivity enables users to configure settings via a smartphone and access cloud services without the need for additional accessories. Additionally, the remote control uses H₂D technology to view and manage comfort features and parameters.

PUMP DESIGN FEATURES

Sound-absorbing ABS protective casings. Technopolymer impellers. Non-return valve with integrated temperature, flow, and pressure sensors.

MOTOR DESIGN FEATURES

Permanent magnet motor cooled by the pumped liquid, encased in a stainless steel jacket for enhanced durability.

ELECTRONICS FEATURES

The inverter-controlled permanent magnet motor ensures significant energy savings. Its inverter feature not only enhances energy efficiency but also provides protection against water hammer. Integrated protections: dry running, excessive current, abnormal voltage, overheating, freezing, stalling, and anti-cycling. Built to Italian standards CEI 2-3 and CEI 61-69 (EN 60335-2-41). The device includes a guided procedure for online connection, enabling easy configuration and remote or local adjustment of all parameters through an app. Users can simplify the setpoint adjustment directly from the pump and view the current status, alarm history, and consumption data via the APP.

ESYBOX POP - ELECTRONIC PRESSURISATION SYSTEM

Pumped liquid temperature range: from 5°C to +50°C

Maximum operating pressure: +50°C

The performance curves are based on kinematic viscosity values = 1 mm²/s and density equal to 1000 kg/m³. Curve tolerance according to ISO 9906.

Two pairs of fittings will be supplied, both elbow and standard.

H₂D DIGITAL SERVICE

THE SMART PLATFORM FOR MANAGING DAB DEVICES REMOTELY

H₂D IS A DAB PLATFORM - AVAILABLE ON MOBILE AND DESKTOP - THAT PAIRS WITH LATEST-GENERATION DAB DEVICES TO SHOW YOU WHAT'S GOING ON INSIDE YOUR SYSTEMS.

It allows you to configure your pump and optimise its operation remotely, saving time, resources and money.

Ideal for anyone seeking to future-proof their business with solutions designed to improve processes, offer more service, and be environmentally responsible.

H₂D FOR PROFESSIONALS

H₂D simplifies and streamlines work routines, allowing for precise configuration of all parameters.

SEE THE FUTURE OF YOUR BUSINESS THROUGH A NEW LENS

Desktop and mobile solutions work together seamlessly. With user-friendly access on your smartphone, it's never been easier to communicate with pumps on site or keep an eye on your systems from anywhere. From your desktop, you can dive deeper into data analysis. You can easily enhance workflow, improve customer service, and grow your business.

OPTIMISE TIME AND WORK

H₂D allows systems to be controlled remotely and, where needed, work on site is easier to plan.

PROBLEM FIXED FIRST TIME, EVERY TIME

H₂D provides all the info you need to prepare the job beforehand for a quick and permanent fix, so the technician can get everything done in one go.

LITTLE OR NO DISRUPTION

Remote monitoring allows you to address potential issues and prevent disruptions.

MORE SERVICE AND LESS URGENT CALLOUTS = INCREASED PROFIT

With remote monitoring, we offer a 24/7 service that includes preventive maintenance services, helping to avoid emergencies.

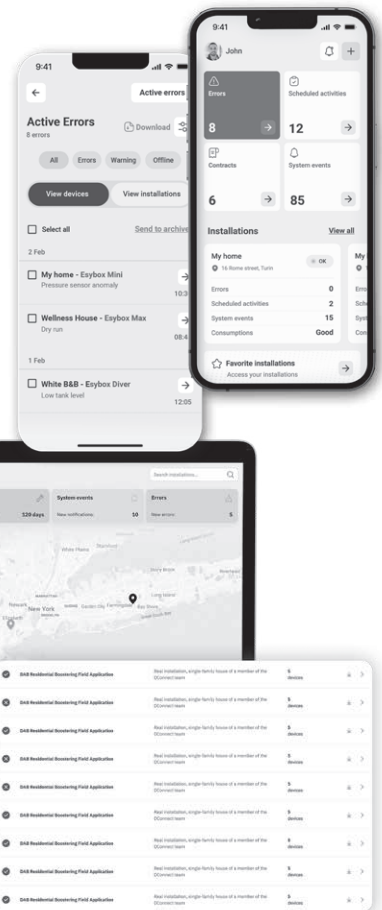

SATISFIED CUSTOMERS

With parameters optimised remotely, the system ensures consistently smooth operation.

FROM DCONNECT TO H₂D

H₂D replaces and improves on DConnect. Latest generation DAB products connect effortlessly to H₂D.

H₂D DIGITAL SERVICE

THE SMART PLATFORM FOR MANAGING DAB DEVICES REMOTELY

H₂D FOR HOMEOWNERS AND END USERS

H₂D is a tool designed to help you manage water use effectively, optimising consumption, costs, and comfort.

OVERVIEW

With H₂D monitoring your water usage and device status in real-time is easy and convenient. If any issues arise, you can contact support immediately, regardless of your location.

SMART HOME. TALK TO ESYBOX POP!

You can activate comfort modes by speaking to voice assistants like Alexa and Google Home. For example, you can say, "Alexa, activate Power Shower."

COMFORT FUNCTIONS

You can access these functions through an app, allowing you to customise the system's performance and features to balance comfort and energy consumption.

POWER SHOWER

Turn a regular shower into a "power shower": this feature increases water pressure just for the time it takes to shower, while reducing usage for the rest of the day.

GOOD NIGHT

During the night or for a quick nap, you can activate sleep mode, which switches the already quiet pump to a whisper-quiet operation, further reducing energy usage.

HOLIDAY MOOD

This important feature helps minimise device activity, thereby saving energy during vacations or extended periods when you are away.
